Submitter Name: John Wurdeman

Submitter Organization: JMPS-NAWCD

Action Item Title: Win200 Timeline

Narrative: Notwithstanding that the NTAG is ( and should primarily be) geek-oriented, it's also the logical forum for the development community to look to for COE/Win2000 timeline info. The Rome web ste is exceptionally (by COE TWG standards) well maintained. Request that best available "expect dates", and what ever else makes sense, be published there.
