

# ***Microsoft Windows 2000 Active Directory***

## Chapter I: Introduction

- [Introduction](#)
- [Directory Service](#)
- [Fundamental Directory Features](#)
- [Active Directory](#)
  - [Advanced Features of Active Directory](#)
  - [Active Directory Concepts](#)
  - [Architectural Concepts](#)
  - [Active Directory Security](#)
  - [Relationship to the DII COE](#)

## Chapter II: Active Directory Systems Interface (ADSI)

- [Introduction](#)
- [Programming Language Support](#)
- [Binding to an ADSI Object](#)
- [Navigation in Active Directory](#)
- [Searching Active Directory](#)
- [ADSI Extensions](#)
- [What Does a Client See?](#)
- [ADSI Utility Interfaces](#)

## Chapter III: Domain Naming System (DNS) and Active Directory

- [Introduction](#)
- [Active Directory Domains](#)
- [Active Directory Domain Naming](#)
- [Active Directory and DNS](#)
- [Locating Active Directory Servers](#)
- [DNS Domain Name Registration](#)
- [NetBIOS Domain Name Registration](#)
- [The \\_msdcs Subdomain](#)
- [SRV Records Registered by Netlogon](#)
- [Host Records for Non-SRV-Aware Clients](#)
- [Other SRV Record Content](#)
- [DsGetDcName API](#)
- [Finding a Domain Controller in the Closest Site](#)
- [Active Directory Site and Subnet Objects](#)
- [Mapping IP Addresses to Site Names](#)
- [Registration in Every Site](#)
- [Clients with No Apparent Site](#)
- [Types of Locator](#)
- [IP/DNS-Compatible Locator Process for Windows 2000 Clients](#)
- [Windows NT 4.0-Compatible Locator Process for Non-IP/DNS Clients](#)
- [Domain Controller Request](#)
- [Domain Controller Response](#)
- [Re-Querying to Find the Closest Site](#)

[Bibliography – Chapter 1](#)

[Bibliography – Chapter 2](#)

[Bibliography – Chapter 3](#)

[Copyright Statement](#)

# *Microsoft Internet Information Server (IIS)*

## Chapter I: Introduction and Architecture

Introduction

IIS Features

Administration Tools

Security

IIS for the Web Developer

Extending IIS

Architecture

IIS Architecture Overview

Administrative Architecture

Programmability Architecture

DII COE Architecture

IIS in the DII COE

Bibliography Chapter I

## Chapter II: ActiveX Data Objects (ADO)

Introduction

ADO from an Enterprise Point of View

What's New with ADO 2.0?

A Quick Tour of ADO Objects

The New Recordset Object

Bookmarks

Recordset Persistence and Buffering

Asynchronous Fetch and Event Handling

Hierarchical Cursors and Data Shaping

The Visual Basic 6.0 Data Environment Designer

Programming ADO in Various Environments

The Web Side of ADO

The RDS Data Factory

Multidimensional ADO

Bibliography Chapter II

## Chapter III: Active Server Pages (ASP)

Introduction

ASP Features

Language Independence

HTML Interfaces

Converting to ASP

Easy Delimiters for Several Languages

Built-In and Installable Objects

Built-In Objects

Using Built-In Objects

Installable Objects

Databases and Cookies

Data-Driven Web Pages

Cookies

Transactions on the Web

Transactions Explained

Transactions on the Internet

Isolated Processes

Security

Access and Identification

Authentication

[Encryption](#)  
[Creating Client/Server Web Applications](#)  
[Sessions and Web Applications](#)  
[Bibliography Chapter III](#)

#### [Chapter IV: Scalability and Performance](#)

[Introduction](#)  
[The IIS Resource Kit](#)  
[Monitoring the Network](#)  
[Memory](#)  
[CPU](#)  
[IIS](#)  
[Streamlining Web Applications](#)  
[Security](#)  
[Be Prepared to Run the Web Server](#)  
[Using the Web Capacity Analysis Tool \(WCAT\)](#)  
[How to Set up WCAT](#)  
[The Server](#)  
[The Client](#)  
[The Controller](#)  
[The Network](#)  
[Performance and Stress Testing](#)  
[Running WCAT for the First Time](#)  
[Configuring](#)  
[Running](#)  
[Analyzing the Results](#)  
[Using and Logging Performance Counters](#)  
[Using Sample.pfc](#)  
[Scripting WCAT Tests](#)  
[Using IIS Extended Log File to Find Runtime Errors](#)  
[Maintaining Session Data Using WCAT](#)  
[Using WCAT to Simulate POSTed Data](#)  
[New WCAT Features and Fixes](#)  
[Bibliography- Chapter IV](#)

#### [Chapter V: IIS Security](#)

[Introduction](#)  
[Windows NT and IIS](#)  
[User Accounts](#)  
[The Windows NT File System](#)  
[IIS Security Up Close](#)  
[Web Permissions vs. NTFS Permissions](#)  
[Choosing The Right Authentication Method](#)  
[Windows NT Challenge/Response](#)  
[Basic authentication](#)  
[Making Basic authentication more secure](#)  
[Client certificate mapping](#)  
[Certificates](#)  
[Many to one mapping](#)  
[One to one mapping](#)  
[Key pairs](#)  
[Obtaining and storing client certificates](#)  
[Custom authentication application](#)  
[IP Address and Domain Name Restriction](#)  
[DNS Lookups](#)  
[The Network ID and Subnet Mask](#)  
[SSL Mysteries](#)  
[Server Bindings and the Server Certificate](#)

[Bit Length](#)  
[Requiring a Secure Connection](#)  
[The "one certificate" trick](#)  
[The easiest way to make the site completely unreachable](#)  
[Bibliography- Chapter V](#)

[Glossary](#)

[Bibliography – Chapter I](#)  
[Bibliography - Chapter II](#)  
[Bibliography – Chapter III](#)  
[Bibliography- Chapter IV](#)  
[Bibliography- Chapter V](#)

[Copyright Statement](#)

# *Microsoft Message Queue (MSMQ)*

## Chapter 1: Introduction and Architecture

### Introduction

What is Microsoft Message Queue?

Message Queue Services

### Logical Architecture

Message Queues

Functional Architecture

DII COE Architecture

Windows NT COE Architecture

Chapter Summary

Other Informational References

Bibliography

## Chapter II: Design Considerations

### Introduction

Message Queues

Messages

### Optimization

Application Design

Single Machine Optimizations

Recoverable Mode Considerations

The Multiple Sender Optimization

Transaction Coordination Alternatives

Locating and Opening Queues

Authentication and Encryption Considerations

Message Header Considerations

Acknowledgment Messages

Journaling Considerations

### Hardware Configuration

System Memory Size

Number of Hard Disks

Hard Disk Type

Registry Key Settings

### MSMQ Performance Measurements

MSMQ Performance

Single Machine, High-Performance Disk Scenario

Single Machine, Conventional Disk Scenario

Networked Machine Scenario

Chapter Summary

Bibliography

## Chapter III: Installation and Configuration

### Introduction

Installing MSMQ

Queue Types

MSMQ Transactional Support

Creating an Installation Share

The MSMQ Tools and Samples

Using MSMQ Explorer

Sending Test Messages

[If it does not seem To Work](#)  
[Using the MQ API Test Sample](#)  
[Locating and Opening A Queue](#)  
[Sending A Message and Closing the Queue](#)  
[Retrieving A Message](#)

[Chapter Summary](#)  
[Bibliography](#)

#### [Chapter IV: Programming Extensions](#)

[Introduction](#)  
[MSMQ Functions](#)  
[MSMQ Properties](#)  
    [Message Properties](#)  
    [Queue Properties](#)  
    [Queue Manager Properties](#)  
[MSMQ Structures](#)  
[MSMQ COM Components](#)  
[Storage Folder Files](#)  
    [Files in the MSMQ \Storage Folder](#)  
    [Files in the MSMQ \Storage\Lqs Folder](#)  
[Programming for Location Independence](#)  
    [Single Mobile Queues](#)  
    [Multiple Mobile Queues](#)  
[MSMQ 101](#)  
    [Receiving Messages with MSMQ Events](#)  
    [Working with a Response Queue](#)  
    [Packing the Message Body](#)  
        [Using a String Parsing Technique](#)  
        [Using PropertyBag Objects](#)  
        [Using Persistable Objects With Visual Basic](#)  
        [Passing ADO Recordsets](#)  
    [Sending Messages inside a Transaction](#)  
    [MSMQ Internal Transactions](#)  
    [External Transactions with MTS](#)  
    [Transactions with Exactly-one Semantics](#)  
[Chapter Summary](#)  
[Bibliography](#)

#### [Chapter V: Security](#)

[Introduction](#)  
[Message Authentication](#)  
[Access Control](#)  
[Message Encryption](#)  
[Auditing](#)  
[Chapter Summary](#)  
[Bibliography](#)

[Bibliography- Chapter 1](#)  
[Bibliography- Chapter 2](#)  
[Bibliography- Chapter 3](#)  
[Bibliography- Chapter 4](#)  
[Bibliography- Chapter 5](#)

# ***Microsoft Windows 2000 Public Key Infrastructure (PKI)***

## Chapter 1: Introduction and Concepts

### Introduction

### Concepts

Public Key Cryptography

Public Key Enabled Functionality

Digital Signatures

Authentication

Secret Key Agreement by Public Key

Bulk Data Encryption Without Prior Shared Secrets

### Protecting and Trusting Cryptographic Keys

Certificates

Certificate Authorities

Trust and Validation

### Windows 2000 PKI Components

#### Certificate Authorities

Certificate Hierarchies

Deploying an Enterprise CA

Trust in Multiple CA Hierarchies

#### Enabling Domain Clients

Generating Keys

Key Recovery

Certificate Enrollment

Renewal

Using Keys and Certificates

Recovery

Roaming

Revocation

Trust

### PK Security Policy in Windows 2000

Trusted CA Roots

Certificate Enrollment and Renewal

Smart Card Logon

### Interoperability

Criteria

The Role of Internet Standards

### Chapter Summary

### Bibliography

## Chapter 2: Development Environment

### Introduction

### Windows 2000 Certificate Services Architecture Revisited

#### Policy Modules

Writing Custom Policy Modules

#### Exit Modules

Writing Custom Exit Modules

#### Extension Handlers

Writing Custom Extension Handlers

#### Intermediaries

### Processing Certificate Requests

### Building a Certificate

### Certificate Properties

### Certificate Enrollment Control

The Certificate Enrollment Control Instantiated in C++

The Certificate Enrollment Control Instantiated in Visual Basic

Certificate Enrollment Control Properties in C++

Certificate Enrollment Control Properties in Visual Basic

- [Creating the Certificate Request](#)
  - [Request Sample in C++](#)
  - [Request Sample in Visual Basic](#)
- [Receiving the Returned Certificate](#)
- [Method Return Values](#)
  - [Return Values For Microsoft C++](#)
  - [Return Values For Microsoft Visual Basic](#)
- [Error Checking](#)
- [CryptoAPI](#)
- [Viewing the Certificate Services Database](#)
- [Using the APIs to Backup Certificate Services](#)
  - [Using the APIs to Restore Certificate Services](#)
- [Chapter Summary](#)
- [Bibliography](#)

### [Chapter 3: Applications](#)

- [Introduction](#)
- [Web Security](#)
- [Secure E-Mail](#)
- [Digitally Signed Content](#)
- [Encrypting File System](#)
- [Smart Card Logon](#)
- [IP Security \(IPSec\)](#)
- [Enterprise and Internet Single Sign On](#)
- [Chapter Summary](#)
- [Bibliography](#)

### [Chapter 4: Installation and Configuration](#)

- [Introduction](#)
- [Windows 2000 Checklists](#)
  - [Checklist: Deploying Certification Authorities and PKI for an Intranet](#)
- [Configuration Considerations](#)
  - [Certification Authority Hierarchies](#)
  - [Renewing Certification Authorities](#)
    - [Why Certification Authorities Need to be Renewed](#)
    - [The Validity Period of a CA and the Validity Period of the Certificates it Issues](#)
    - [Planning for the Renewal of a CA](#)
    - [Renewing a Root Certification Authority](#)
    - [Renewing a Subordinate Certification Authority](#)
- [Installing Certificate Services](#)
  - [To Install an Enterprise Root Certification Authority](#)
  - [To Install an Enterprise Subordinate Certification Authority](#)
  - [To Set Security Permissions and Delegate Control of Certificate Templates](#)
  - [To Set Security Permissions and Delegate Control of a Certification Authority](#)
  - [To Establish the Certificate Types that an Enterprise Certification Authority Can Issue](#)
  - [To Schedule the Publication of the Certificate Revocation List](#)
  - [To Set Security for Access to Certification Authority Web Pages](#)
  - [To Create an Automatic Certificate Request for Computers in a Group Policy Object](#)
- [Managing Certificate Authorities](#)
  - [To Revoke an Issued Certificate](#)
  - [To Back Up a Certification Authority](#)
  - [To Restore a Certification Authority From a Backup Copy](#)
  - [To Renew a Root Certification Authority](#)
  - [To Renew a Subordinate Certification Authority](#)

[To Manually Publish the Certificate Revocation List](#)

[Installing Clients](#)

[Working with MMC Console Files](#)

[To Add An Item to a New MMC Console for a Local Computer](#)

[To Open a Saved MMC Console for a Local Computer](#)

[To Add an Item to a New MMC Console for a Remote Computer](#)

[To Open a Saved MMC Console for a Remote Computer](#)

[To Request a Certificate](#)

[To Submit an Advanced Certificate Request Via the Web](#)

[To Request a Certificate Using a PKCS #10 or PKCS #7 File](#)

[To Check on a Pending Web Certificate Request](#)

[Managing Client Certificates](#)

[To Renew a Certificate with the Same Key](#)

[To Renew a Certificate with a New Key](#)

[To Import a Certificate](#)

[To Export a Certificate](#)

[To Export a Certificate with the Private Key](#)

[Viewing Certificate Information](#)

[Chapter Summary](#)

[Bibliography](#)
